Blackjack has the best odds of winning, with a house edge of just 1 percent in most casinos, Bean said. Plus, you are playing against only the dealer, not hooded poker champions.

The goal of each player is to win the pot, which contains all the bets that the players have made in any one deal. A player makes a bet in hopes that they have the best pot, which to give the impression that they do. In most Poker versions, the top combination of five cards is the best hand.

The Deal

Each player receives two cards face down and then one card face up, dealt one at a time in rotation.

The Play

After the initial deal, there is a betting interval. Each active player receives three more face up cards and one more face down card, with a betting interval after each round of cards dealt. In the showdown, each player turns up all of their hole cards and selects five of their seven cards as their hand. The player must separate these cards from the other two, which they discard. The player cannot reclaim their discards upon finding that a better five-card combination could have been made.
