[mines fezbet](#)

An ace-high straight flush, commonly known as a royal flush, is the best possible hand in many variants of poker.

In poker, players form sets of five playing cards, called hands, according to the rules of the game.[1] Each hand has a rank, which is compared against the ranks of other hands participating in the showdown to decide who wins the pot.[2] In high games, like Texas hold 'em and seven-card stud, the highest-ranking hands win. In low games, like razz, the lowest-ranking hands win. In high-low split games, both the highest-ranking and lowest-ranking hands win, though different rules are used to rank the high and low hands.[3][4]

Each hand belongs to a category

determined by the patterns formed by its cards. A hand in a higher-ranking category always ranks higher than a hand in a lower-ranking category. A hand is ranked within its category using the ranks of its cards. Individual cards are ranked, from highest to lowest: A, K, Q, J, 10, 9, 8, 7, 6, 5, 4, 3 and 2.[5] However, aces have the highest rank under ace-to-five high or six-to-ace low rules, or under high rules as part of a five-high straight or straight flush.[6][7] Suits are not ranked, so hands that differ by suit alone are of equal rank.[8]

There are nine categories of hand when using a standard 52-card deck, except under ace-to-five low rules where straights, flushes and straight flushes are not recognized. An additional category, five of a kind, exists when using one or more wild cards. The fewer hands a category contains, the higher its rank.[9] There are $52! \cdot (52-5)! = 311,875,200$ ways to deal five cards from the deck but

only $52! / (52-5)! \cdot 5! = 2,598,960$ distinct hands, because the order in which cards are dealt or arranged in a hand does not matter.[10] Moreover, since hands differing only by suit are of equal rank, there are only 7,462 distinct hand ranks.[11]

Hand-ranking categories [edit]

* Only possible when using one or more wild

cards ** Category does not exist under ace-to-five low rules

Five of a kind [edit]

]

Five of a kind, aces

Five of a kind is a hand that contains five cards of one rank, such as 3 3 3 3 3 ("five of a kind, threes"). It ranks above a straight flush but is only possible when using one or more wild cards, as there are only four cards of each rank in the deck.[6] Five of a kind, aces, A A A A Jkr, becomes possible when a joker is added to the deck as a bug, a form of wild card that may act as a fifth ace.[5] Other wild card rules allow jokers or other designated cards to represent any card in the deck, making it possible to form five of a kind of any rank.[12]

Each five

of a kind is ranked by the rank of its quintuplet. For example, Q Q Q Q Q ranks higher than 6 6 6 6 6.[6][13]

Straight flush [edit]

A jack-high straight flush

A

straight flush is a hand that contains five cards of sequential rank, all of the same suit, such as Q J 10 9 8 (a "queen-high straight flush").[4] It ranks below five of a kind and above four of a kind.[5] Under high rules, an ace can rank either high (as in A K Q J 10, an ace-high straight flush) or low (as in 5 4 3 2 A, a five-high straight flush), but cannot simultaneously rank both high and low (so Q K A 2 3 is an ace-high flush, but not a straight).[6][13] Under deuce-to-seven low rules, an ace always ranks high (so 5 4 3 2 A is an ace-high flush). Under ace-to-six low rules, an ace always ranks low (so A K Q J 10 is a king-high flush).[14] Under ace-to-five low rules, straight flushes are not possible (so 9 8 7 6 5 is a nine-high hand).[7]

Each straight flush is ranked by the rank of its

highest-ranking card. For example, 10 9 8 7 6 ranks higher than 8 7 6 5 4, which ranks higher than 6 5 4 3 2. Straight flush hands that differ by suit alone, such as 7 6 5 4 3 and 7 6 5 4 3, are of equal rank.[6][13]

An ace-high

straight flush, such as A K Q J 10, is called a royal flush or royal straight flush and is the best possible hand in ace-high games when wild cards are not used.[5][15][16] A five-high straight flush, such as 5 4 3 2 A, is called a steel wheel and is both the best low hand and usually the best high hand of the showdown in ace-to-five high-low split games.[4]

Four of a kind [edit]

Four of a kind, fives

Four

of a kind, also known as quads, is a hand that contains four cards of one rank and one card of another rank (the kicker), such as 9 9 9 9 J ("four of a kind, nines"). It ranks below a straight flush and above a full house.[5]

Each four of a kind is ranked

first by the rank of its quadruplet, and then by the rank of its kicker. For example, K K K K 3 ranks higher than 7 7 7 7 Q, which ranks higher than 7 7 7 7

10. Four of a kind hands that differ by suit alone, such as 4 4 4 4 9 and 4 4 4 9, are of equal rank.[6][13]

Full house [edit]

A full house, sixes over kings

A full house, also known as a full boat or a tight or a boat (and originally called a full hand), is a hand that contains three cards of one rank and two cards of another rank, such as 3 3 3 6 6 (a "full house, threes over sixes" or "threes full of sixes" or "threes full").[17][18] It ranks below four of a kind and above a flush.[5]

Each full house is ranked first by the rank of its triplet, and then by the rank of its pair. For example, 8 8 8 7 7 ranks higher than 4 4 4 9 9, which ranks higher than 4 4 4 5 5. Full house hands that differ by suit alone, such as K K K J J and K K K J J, are of equal rank.[6][13]

Flush [edit]

A jack-high flush

A flush is a hand that contains five cards all of the same suit, not all of sequential rank, such as K 10 7 6 4 (a "king-high flush" or a "king-ten-high flush").[19] It ranks below a full house and above a straight.[5] Under ace-to-five low rules, flushes are not possible (so J 8 4 3 2 is a jack-high hand).[7]

Each flush

is ranked first by the rank of its highest-ranking card, then by the rank of its second highest-ranking card, then by the rank of its third highest-ranking card, then by the rank of its fourth highest-ranking card, and finally by the rank of its lowest-ranking card. For example, K J 9 6 4 ranks higher than Q J 7 6 5, which ranks higher than J 10 9 4 2, which ranks higher than J 10 8 6 3, which ranks higher than J 10 8 4 3, which ranks higher than J 10 8 4 2. Flush hands that differ by suit alone, such as 10 8 7 6 5 and 10 8 7 6 5, are of equal rank.[6][13]

Straight [edit]

A ten-high straight

A straight is a hand that contains

five cards of sequential rank, not all of the same suit, such as 7 6 5 4 3 (a "seven-high straight"). It ranks below a flush and above three of a kind.[5] Under high rules, an ace can rank either high (as in A K Q J 10, an ace-high straight) or low (as in 5 4 3 2 A, a five-high straight), but cannot simultaneously rank both high and low (so Q K A 2 3 is an ace-high hand).[6][13] Under deuce-to-seven low rules, an ace always ranks high (so 5 4 3 2 A is an ace-high hand). Under ace-to-six low rules, an ace always ranks low (so A K Q J 10 is a king-high hand).[14] Under ace-to-five low rules, straights are not possible (so 10 9 8 7 6 is a ten-high hand).[7]

Each straight is ranked by the rank of its highest-ranking card. For example,

J 10 9 8 7 ranks higher than 10 9 8 7 6, which ranks higher than 6 5 4 3

2. Straight hands that differ by suit alone, such as 9 8 7 6 5 and 9 8 7 6

5, are of equal rank.[6][13]

An ace-high straight, such as A K Q J 10, is called

a Broadway straight,[20] while a five-high straight, such as 5 4 3 2 A, is called a baby straight,[21] bicycle or wheel and is the best possible hand in ace-to-five low games (where it is a high card hand, not a straight).[22][23]

Three of a kind [edit]

]

Three of a kind, queens

Three of a kind, also known as trips or a set, is a hand that contains three cards of one rank and two cards of two other ranks (the kickers), such as 2 2 2 K 6 ("three of a kind, twos" or "trip twos" or a "set of twos"). It ranks below a straight and above two pair.[5]

Each three of a kind is ranked first by the rank of its triplet, then by the rank of its highest-ranking kicker, and finally by the rank of its lowest-ranking kicker. For example, 6 6 6 Q 4 ranks higher than 3 3 3 K 2, which ranks higher than 3 3 3 J 7, which ranks higher than 3 3 3 J 5. Three of a kind hands that differ by suit alone, such as 9 9 9 10 8 and 9 9 9 10 8, are of equal rank.[6][13]

In community card games, such as Texas hold 'em, three of a kind is called a set only when it comprises a pocket pair and a third card on the board.[24]

Two pair [edit]

Two pair, jacks and threes

Two pair is a hand that contains two cards of one rank, two cards of another rank and one card of a third rank (the kicker), such as J J 4 4 9 ("two pair, jacks and fours" or "two pair, jacks over fours" or "jacks up").[17][25] It ranks below three of a kind and above one pair.[5]

Each two pair is ranked first by the rank of its higher-ranking pair, then by the rank of its lower-ranking pair, and finally by the rank of its kicker. For example, 10 10 2 2 K ranks higher than 5 5 4 4 10, which ranks higher than 5 5 3 3 Q, which ranks higher than 5 5 3 3 J. Two pair hands that differ by suit alone, such as K K 7 7 8 and K K 7 7 8, are of equal rank.[6][13]

One pair [edit]

]

One pair, tens

One pair, or simply a pair, is a hand that contains two cards of one rank and three cards of three other ranks (the kickers), such as 4 4 K 10 5 ("one pair, fours" or a "pair of fours"). It ranks below two pair and above high card.[5]

Each one pair is ranked first by the rank of its pair, then by the rank of its highest-ranking kicker, then by the rank of its second highest-ranking kicker, and finally by the rank of its lowest-ranking kicker. For example, 9 9 Q J 5 ranks higher than 6 6 K 7 4, which ranks higher than 6 6 Q J 2, which ranks higher than 6 6 Q 8 7, which ranks higher than 6 6 Q 8 3. One-pair hands that differ by suit alone, such as 8 8 10 6 5 and 8 8 10 6 5, are of equal rank.[6][13]

High card [edit]

High card, king

High card, also known as no pair or simply nothing, is a hand that does not fall into any other category, such as K J 8 7 4 ("high card, king" or "king-jack-high" or "king-high").[17][26] Note that under ace-to-five low rules, straights, flushes and straight flushes are not possible, so such hands are instead high card hands.[7] It ranks below one pair.[5]

Each high card

hand is ranked first by the rank of its highest-ranking card, then by the rank of its second highest-ranking card, then by the rank of its third highest-ranking card, then by the rank of its fourth highest-ranking card, and finally by the rank of its lowest-ranking card. For example, K 6 5 3 2 ranks higher than Q J 6 5 3, which ranks higher than Q 10 8 7 4, which ranks higher than Q 10 7 6 4, which ranks higher than Q 10 7 5 4, which ranks higher than Q 10 7 5 2. High card

hands that differ by suit alone, such as 10 8 7 6 4 and 10 8 7 6 4, are of equal rank.[6][13]

Under deuce-to-seven low rules, a seven-five-high hand, such as 7 5 4 3 2, is the best possible hand.[27] Under ace-to-six low rules, where aces have the lowest rank, a six-four-high hand, such as 6 4 3 2 A, is the best possible hand.[28] Under ace-to-five low rules, where aces have the lowest rank and straights, flushes and straight flushes are not possible, a five-high hand, such as 5 4 3 2 A or 5 4 3 2 A, commonly known as a bicycle or wheel, is the best possible hand.[7][22]

Autoridades de saúde estão investigando um surto de bactérias produtoras de toxinas do *Escherichia coli* (*E. coli*) ligadas a pelo menos uma morte no Reino Unido e doença mr jack esporte mais de 250 pessoas. Mas o que é o organismo causando o surto e quanto é perigoso?

O que é *Escherichia coli* (*E. coli*)?

Escherichia coli é um grupo de bactérias que normalmente vivem no trato digestivo de humanos e animais. A maioria das cepas é inofensiva, mas algumas produzem toxinas que podem causar doenças, variando de gastroenterite leve e febre a diarreia grave, crampas abdominais e vômitos. Os sintomas tendem a aparecer alguns dias após a ingestão ou contato com as bactérias, mas podem ocorrer mr jack esporte um a 10 dias. A doença geralmente resolve sozinha mr jack esporte cerca de duas semanas.

O que está por trás do último surto?

O aumento de casos é causado por um tipo de *E. coli* produtor de toxina Shiga, ou *Stec*. No Reino Unido, há cerca de 1.500 casos de *Stec* anualmente. Desde que o surto mais recente foi detectado mr jack esporte 25 de maio, a Agência de Segurança de Saúde do Reino Unido registrou 275 casos, com mais de 100 internações hospitalares. Casos foram registrados na Inglaterra, Escócia, País de Gales e Irlanda do Norte e foram rastreados para alface mr jack esporte sanduíches comprados mr jack esporte lojas.

O que o veneno Shiga faz?

O veneno afeta o corpo mr jack esporte vários aspectos, desde a inibição da fabricação de proteínas envolvidas na fisiologia básica até a disparar respostas imunológicas incontroláveis que afetam os rins, intestinos e sistema nervoso central.

Como as pessoas se tornam infectadas?

As bactérias *Stec* vivem no intestino de gado, ovelhas e outros animais. A carne pode ficar contaminada durante o processo de abate, tornando a carne crua uma fonte comum de infecção. Mas as bactérias também se espalham através de água contaminada e alimentos contaminados, como alface, alfafa, germinações, salame, sumos de frutas e leite não pasteurizado. Outras rotas envolvem contato com animais ou seus excrementos, ou outra pessoa infectada. As bactérias são altamente infecciosas, portanto, podem se espalhar rapidamente entre famílias e locais onde as pessoas podem ter dificuldade de se manter limpas, como creches, escolas, lares de idosos e hospitais.

Quem corre mais risco?

Qualquer pessoa pode contrair uma infecção *Stec* e muitas pessoas terão apenas doença leve. Mas crianças e pessoas mais velhas são mais suscetíveis a infecções graves. Em algumas pessoas, principalmente crianças com menos de cinco anos, a infecção pode levar a síndrome hemolítico-urêmica (HUS), uma causa de insuficiência renal potencialmente fatal. Adultos podem desenvolver uma condição semelhante, rara, chamada púrpura trombocitopênica trombótica (TTP). Isso causa coágulos sanguíneos pequenos vasos sanguíneos todo o corpo. Os coágulos podem desacelerar ou parar o fluxo sanguíneo no cérebro, rins e coração.

Até 25 de junho, cerca da metade das pessoas infectadas no surto foram hospitalizadas. Duas pessoas morreram dentro dos 28 dias de suas infecções. Embora ambos tivessem condições de saúde subjacentes, apenas um é pensado para ter morrido devido à infecção. De acordo com Paul Hunter, professor de medicina na Universidade de East Anglia, a taxa de mortalidade de infecções por *Stec* é de cerca de 0,5%, com a maioria ocorrendo entre pessoas com 65 anos ou mais. Cerca de 10% das infecções podem levar a HUS, que tem uma taxa de mortalidade de até 5%.

Como devo evitar infecção?

Poucas *Stec* células podem ser suficientes para causar doença, portanto, a higiene pessoal adequada, garantir que as verduras de salada sejam devidamente lavadas e que a carne seja bem cozida e não deixada de fora são precauções importantes. Como de costume, lave as mãos após usar o banheiro, trocar um fralda, manipular carne crua, antes das refeições e após contato com animais. Não nadar em águas que possa estar contaminada por gado ou ovelhas em campos próximos. Crianças e idosos, que correm maior risco de doença grave, são aconselhados a evitar leite e outros produtos lácteos não pasteurizados.

O surto acabou?

Embora o pico do surto pareça ter passado, é provável que haja mais casos e haja mais mortes.

Saladas folhosas são um risco bem conhecido para infecções por *Stec* e são difíceis de evitar, diz Hunter, que acredita que pode ser impossível determinar exatamente como a alface ficou contaminada ou mesmo de onde ela foi cultivada. "Novas infecções, a partir dessa fonte pelo menos, parecem ter sido controladas, mas, claro, infecções por *Stec* não são tão raras e provavelmente continuarão a ser relatadas", ele diz.
